Office Action Summary

Application No.

10/070,920

Applicant(s)

TOWNSEND ET AL.

Examiner

Quang Nguyen, Ph.D.

Art Unit

1636

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 1-30 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims 1-30 are pending in the present application, and they are subjected to the following election/restrictions.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, 12, 17-19 and 28-29, drawn to a method for increasing the production of clavulanic acid in a host or host cell comprising the step of increasing the level of N²-(2-carboxyethyl) arginine synthase by gene dosing, and a host cell stably transformed with orf2:

Group II, claims 1, 11-18 and 20, drawn to a method for increasing the production of clavulanic acid in a host or host cell comprising the step of increasing the level of N²-(2-carboxyethyl) arginine synthase by adjusting fermentation conditions and/or providing additives which effect the optimization of N²-(2-carboxyethyl) arginine synthase.

Group III, claims 21-24, drawn to a method for preparing a composition having N²-(2-carboxyethyl) arginine synthase activity.

Group IV, claims 25-27, drawn to an assay for identifying substrates of the enzyme N²-(2-carboxyethyl) arginine synthase.

Group V, claim 30, drawn to a condensation product of two substrates condensed by N²-(2-carboxyethyl) arginine synthase.

The technical feature linking Groups I and II appear to be that they all relate to a a method for increasing the production of clavulanic acid in a host or a host cell

Art Unit: 1636

comprising the step of increasing the level of N²-(2-carboxyethyl) arginine synthase in said host or host cell that results in increased production of clavulanic acid.

However, Otero et al. (WO 97/19187) already teach a fermentation process under certain cultured conditions resulting in a substantial increased production of clavulanic acid in strains of *streptomyces clavuligerus* ATCC 27064 or mutants thereof (abstract). In the absence of evidence to the contrary, it is inherent that the method of Otero et al. results in the optimization of N²-(2-carboxyethyl) arginine synthase level and/or activity.

Therefore, the technical feature linking the inventions of Groups I to II does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not differentiate the claimed subject matter as a whole over the prior art. Since according to Rule 13.2 PCT the presence of such a common or corresponding special technical feature is an absolute prerequisite for unity to be established, and given that there does not appear to be any other technical feature common to the claimed subject matter as a whole which might be able to fulfill this role, the currently claimed subject matter lacks unity of invention according to Rule 13.1 PCT.

The methods of Groups I-IV also lack a common or corresponding special technical feature one from the others for the following reasons. The method of Group I does not require the step of adjusting fermentation conditions and/or providing additives which effect the optimization of N²-(2-carboxyethyl) arginine synthase activity as required by the method of Group II. The method of Group II does not need the step of gene dosing as required by the method of Group I. Neither the method of Group I nor

Art Unit: 1636

Group II requires the step(s) involved in the preparation of a composition having N^2 -(2-carboxyethyl) arginine synthase activity as recited in the method of Group III. None of the methods of Groups I-III requires the step(s) involved in an assay for identifying substrates of the enzyme N^2 -(2-carboxyethyl) arginine synthase of Group IV.

A condensation product (unknown structure) of two substrates (unknown structures) condensed by N^2 -(2-carboxyethyl) arginine synthase of Group V is not required in any of the methods of Groups I-IV.

Because the currently claimed subject matter lacks unity according to Rule 13.1 PCT for the reasons set forth above, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang Nguyen, Ph.D., whose telephone number is (571) 272-0776.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's mentor, David Guzo, Ph.D., may be reached at (571) 272-0767, or SPE, Irem Yucel, Ph.D., at (571) 272-0781.

To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1636; Central Fax No. (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight

Art Unit: 1636

(EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.

Quang Nguyen, Ph.D.

A handwritten signature in black ink, appearing to read "Quang Nguyen". The signature is fluid and cursive, with the first name "Quang" written in a stylized, looped manner and the last name "Nguyen" written in a more standard cursive script.
